-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- ☐ Other: ____.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burrow.

Burrow teaches a direct smelting plant with water cooled walls (14) including, components a-i of instant claim 1 recited in claim 1 of Burrow, the solids feed means of instant claims 2-10 disclosed at (27) of the drawings, and claims 11-13 of Burrow for example, the crane means of instant claims 18 and 19 disclosed at col. 5 lines 30-50 for example, and the tapping means of claims 20-25 disclosed at claims 6 and 14-17 of Burrow for example, thereby showing all aspects of the above claims except the use or specific placement of platforms or doors for allowing the plant to be accessible by operators, although Burrow does state, at col. 1 lines 63-65 for example that necessary access and handling facilities should be provided for operation of the plant, and also, at col. 5 lines 43-50 for example, that access doors for access to the interior of the vessel should be provided, although Burrow does not state where these platforms (access facilities) and doors should be placed in the plant. However, because the smelting plant of Burrow is arranged and operated in substantially the same manner as that of the instant claims, and would therefore require operators at substantially the same locations as in the instant claims, motivation to place the platforms and doors suggested by Burrow in the locations recited by the instant claims as required for efficient operation of the plant of the type disclosed by Burrow, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Related patent publication US 2004/0256773 A1 to Dry et al is also cited as an example of direct smelting plants.
